Questions**1. Comments to the Authors**

1. Some formatting and grammatical issues.
2. Clearly state the novelty and contributions of the work.
3. Fig 4 is blurry, and needs to be added again.
4. References include blog and other URLs. They usually include proper research work like research papers, conference papers, books, patents, etc. Blogs and other websites should not be cited.

2. Select the Appropriate Score based on the Overall Quality of the Paper

Questions**1. Comments to the Authors**

Dear Authors,

Good Greetings!

The paper ID 123 titled “ Classification of Malicious and Benign Memory Signatures Using Memory Forensics and Machine Learning” employ memory forensics and machine learning techniques to classify memory signatures as either malicious or benign and is appropriate to the conference. In this manuscript, the authors highlight the escalating threat of malware attacks and the limitations of traditional security measures. It emphasizes the necessity for AI-based solutions, with the research proposing a novel approach integrating Memory Forensics, YARA Rules, and Artificial Intelligence to enhance malware detection capabilities. The proposed analysis is well composed making the whole paper expressive and compelling. I recommend accepting the paper for publication in the Fifth International Conference on Computing,

Communication and Cyber Security (IC4S'05) Volume1 after minor revision.

Authors can apply the comments given below for motivating more the readers,

1. The abstract necessitates clarification and concise summarization to highlight the primary contributions of the proposed approach, emphasizing its significance in advancing skin cancer classification methodologies.
2. Try to manage some reputations in the manuscript.
3. Discussing in detail the paper's constraints in the conclusion section is imperative to provide a comprehensive understanding of its limitations and potential areas for future research.
4. Include more recent sources to update the paper's references and ensure its alignment with the latest developments in the field, thereby enhancing its relevance.

Best Regards,
